

SENAMA YOUTH CLUB

REPORT

13TH SEPTEMBER, 2024

On Friday, 13th September, 2024, SEMANA youth club conducted an awareness outreach campaign at Fibale primary school in Mansa.

The activity was carried out by the youth club members led by the club secretary, with support from the ministry of education and ministry of health. Present at the meeting was the School head teacher and four Teachers

The purpose of this activity was to equip learners with information on climate change and skills that will help build resilience to climate change.

Some of the things discussed were the

causes of climate change which included:

- Burning of fossil fuels
- industrial emissions
- Reforestation
- improper waste management
- transport and vehicles

The effects of climate:

- extreme weather events
- increased hunger due to low production of food
- drought
- floods

- displacement
- land degradation
- diseases
- low economic performance

Ways of reducing the impacts of climate change

- restore nature for storage of carbon
- switch to sustainable transport
- improve farming methods
- investing in renewable energy sources
- proper waste management

In short, reduce, reuse and recycle

With this information, we're able to save the environment and attain a just climate.

The total number of people reached was 432 of which 136 were males, with 3 being teachers, 3 club members and 130 pupils, and a total of 296 females of which 3 are club members, 1 female teacher and 292 pupils.
