### Narrative Report of the Activity

#### What were the activity objective?

The objective was to introduce the project that aiming at addressing climate change mitigation and adaptation through education and innovations to the stakeholders.

#### Were the activity objective/aims met? If yes, how? If not, why?

During the launch of the project stakeholders appreciated this kind of activities has very important for climate change as left no one. The councillor from muchinka ward promised to support the care for nature club with some trees to demonstrate the need for afforestation.

#### Activity Process: What took place? What went well?

# Care for Nature Zambia

- On 5<sup>th</sup> September 2024 care for nature Zambia youth club launched a child and youth led project under the Mansa mayor's office supported by Bloomberg philanthropies, the project is aiming at addressing climate change mitigation and adaptation. In attendance was his worship the Mayor of Mansa, Namwandwe councillor, Muchinka ward councillor, the head woman Malunga, forestry department, Disaster management and mitigation unit, youth and sports, child department, pupils from Namwandwe combined school and Kombaniya combined school and the head teacher and chaperons from each school, care for nature secretariate and members from other youth's club implementing a similar project.
- During the launch care for nature youth club members laboured to explain about the project, its objectives and the intend to achieve during the implementation of this project, also they mentioned the scope of the project. the club members told the stakeholders that the project is only going to be successful if all the key stakeholders present work closely youth the youths.
- The councillors from two wards which is Muchinka and Namwandwe ward where happy to know that this project will be implemented in their wards, and they promised to give the support that they can to the youths during the implementation of the project and the Councillor from Muchinka promised to give the youth 20 trees to demonstrate the need for afforestation.
- During this activity youths from the clubs showcased the activities that there has been doing, Namwandwe combined school showcased how their combat climate change through recline of bottle tops to make hand bags, skipping ropes and pencil cases while on of the youth member showcased how the club is using music to sensitize the communities on the impact of climate and how they can mitigate and adapt. His worship the Mayor of Mansa emphasised on the need for stakeholder to support the implementation of these project by all the stakeholders and I appreciated the traditional leaders for finding time to support the program.

## **Challenges faced & mitigation measures employed during the activity:**

- The time that the launch organized there so many activities happening in the district, this made the district commissioner to fail to attend the launch, also the materials that where procured such as T-shirts didn't arrive on time.

## **What could be done to improve next time?**

- To ensure that before setting the day for activity we find out the programs for the district and also to ensure that materials are procured on time.

## **Additional comments/recommendations on the activity:**

- There will be a follow up activity which will community sensitizations in sumbus's community and namwandwe community to sensitize the on-climate change adaptation and mitigation.
